

Keep your business
one step ahead

We can now provide you with the latest technology
in vehicle tracking systems from **foretrack**

foretrack's live GPS vehicle tracking system, provides you with total, around the clock visibility of your mobile workforce. With over 29 years experience in specialist communication solutions foretrack is a fully integrated service provider. Their web-based solution undergoes constant innovation and development meaning that you will always benefit from maximum return on your investment.

Using UK developed technology, the foretrack online system and associated products deliver outstanding quality and value. Their ever-increasing customer base serves testament to foretrack's excellent reputation for service and support.

Whether you manage a fleet of lorries or require portable tracking to protect your trailers, your business will benefit from foretrack.

FUEL - Monitor your fleet fuel use, compare across your fleet and analyse driver habits to increase mpg. Control your costs and save money by easily reviewing every journey cost for each vehicle in your fleet, calculated by the cost per mile and the cost per running hour.

CONGESTION CHARGING - foretrack's London Congestion Charge Alarming and Monitoring System, allows users to plan routes avoiding the charges. Plus, our alarm system generates an email alert to inform you if any of your vehicles enter the Congestion Zone to avoid unexpected surprises and costs for late or unpaid penalties.

THEFT - Using the live system to track down stolen vehicles or assets, the system can also provide Ordnance Survey coordinates to assist the police in recovering your property

LOGISTICS - Real-time coordination and historical assessment of the utilisation of your fleet. foretrack's easy to use reports will enable you to accurately validate overtime and working sheets along with the ability to plan your MOT and Service scheduling.

HEALTH & SAFETY - Working time directive, driver profile and lone working can all be monitored.
